I have subscribed to Satelite Radio to get away from FCC governed radio. I don't need to listen to useless commercials nor do I have the time to wait for a traffic or weather reports. I live in the Chicago area, where traffic and weather changes like the time of day. Satelite Radio offers me instant reports if and when I want/need them. The writing is on the wall. You FCC Bastards' useless jobs may be on the line. Big Money Communication Companies that contribute \$\$\$ to government officials for election or re-election to be used as tools to spread propaganda to the ignorant American Pubic, need to be abolished. Howard Stern is a prime example of our freedom of speach ammendment being taken away from the people as is many of our other constitutional rights. As it was once said... We have a government of the people, for the people, and UP the people. The reason this Country was started was to get out from under Englands B.S. Government and Taxes. If I had lived in England some 200 years ago and and came back to this country in present day, I would believe I never left England. The FCC is one of the drains on the Tax Payers dollars that serves no purpose other than to justify its existence for the money its employees put into their pockets. Fines are inflicted on those who speak out against their government to silence the truth. This issue with trying to silence Satelite Radio is just one more example of our government's more and more becoming communistic way.
